BestTurn

Airlines lose a flight's profit the moment it waits for ground crew.

BestTurn SpotWork

We fill shifts in 3 minutes with AI-matched, security-cleared workers.

Wonjin Choi, Founder & CEO · wonjin@bestturnaround.com · U.S. Investor Deck 2026

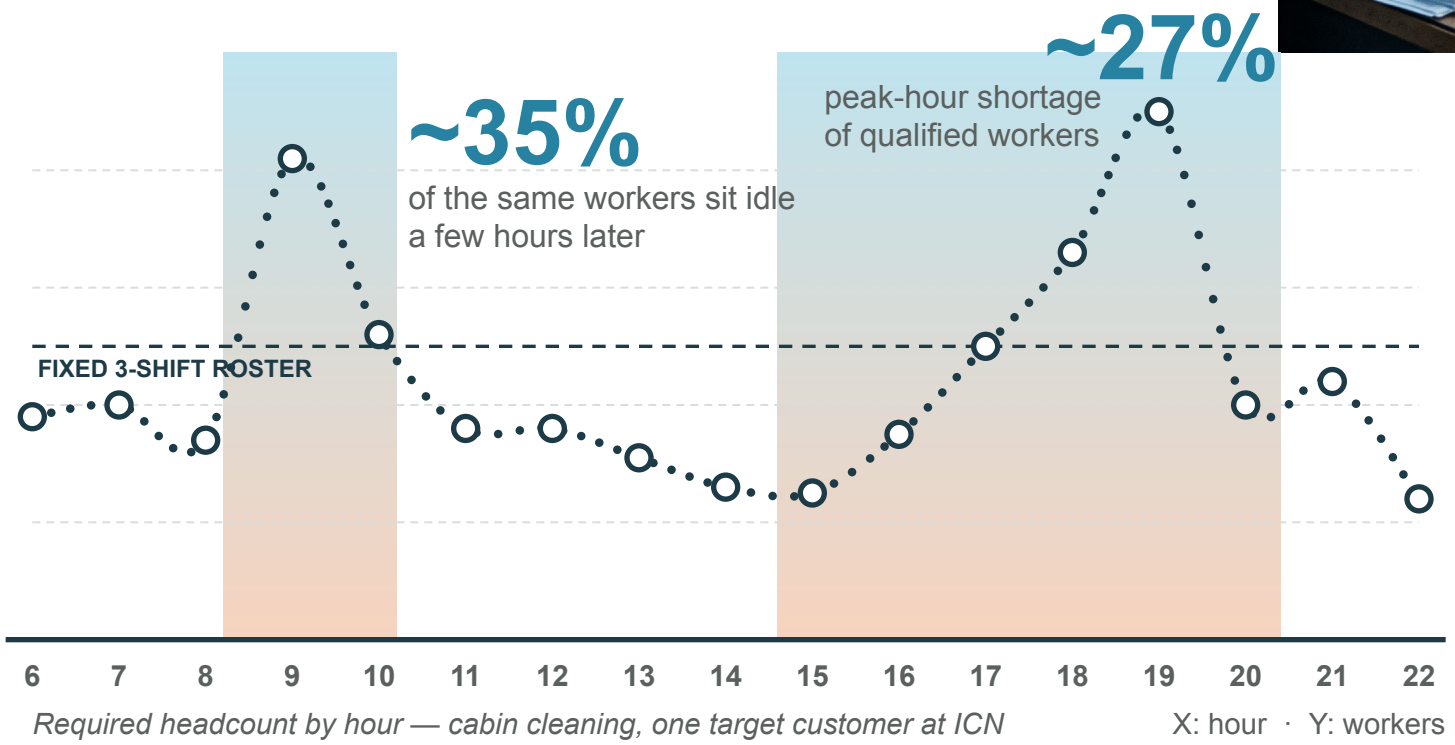

PROBLEM

U.S. airports can't staff the peaks — and pay for the valleys

Record traffic, fewer ground workers — at every major hub, including the U.S.

Airlines and handlers still run staffing on phone calls, spreadsheets and rigid rosters.

Required headcount by hour — cabin cleaning, one target customer at ICN

X: hour · Y: workers

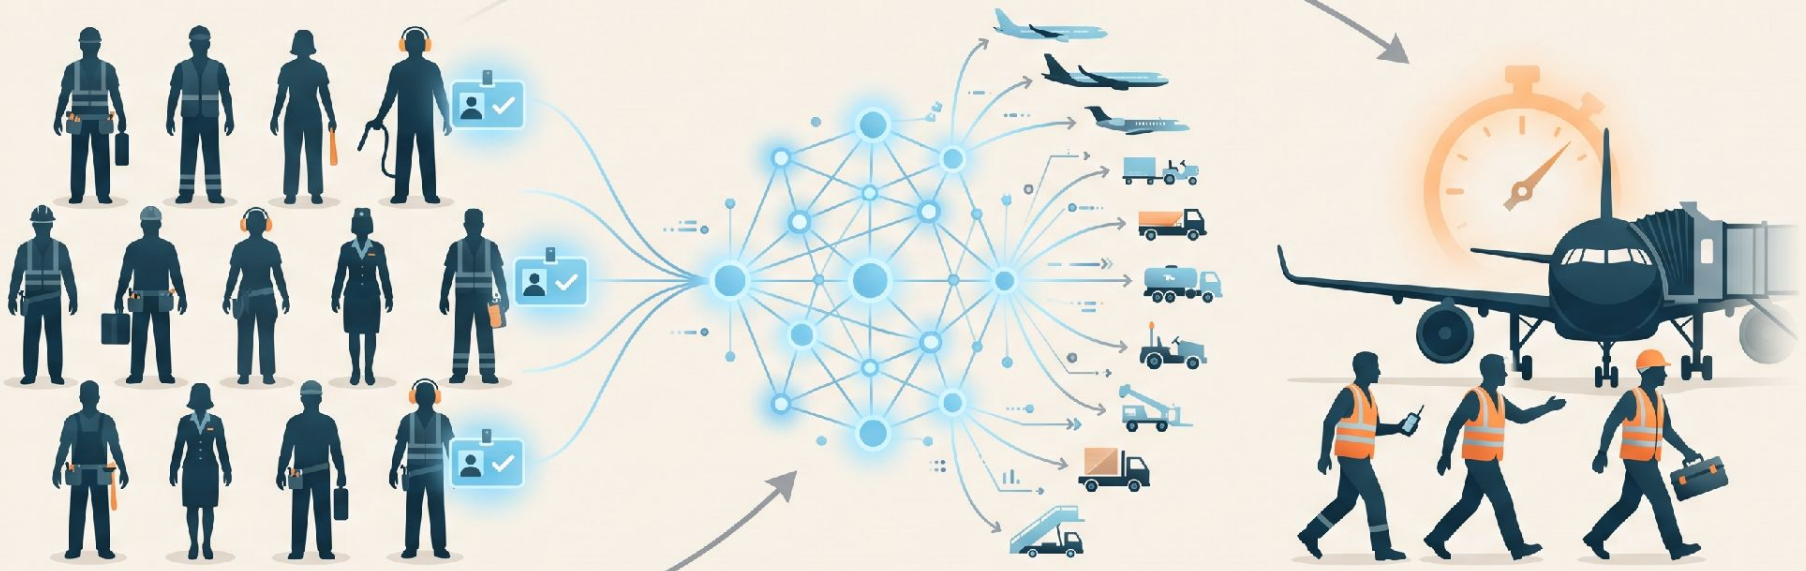

Workforce software is top-down. It optimizes the workers you already have.

Nobody solves the workers you don't have.

SOLUTION

From delay to dispatch in 3 minutes

BestTurn SpotWork — the airport's own workers, security-cleared, matched by AI.

1 · Verified worker pool

14:05

Flight delayed. Cabin cleaning suddenly needs 2 teams, not 1.

2 · AI matching engine

14:06

Alert pushed to 300+ cleared workers nearby, ranked by AI on 6 factors.

3 · Dispatch in 3 minutes

14:08

Best-fit workers accept. Operations continue — no delay.

↻ LEARN

OPERATE

Assignment, briefing, time-logging, monitoring — all digital.

LEARN

Every accept / reject / delay becomes training data — reinforcement learning makes the next match smarter.

MARKET · WHY THE U.S.

The largest ground-handling market

NORTH AMERICA · GROUND & CARGO HANDLING · 2025

$18B

The largest single market in a $44B global ground-handling industry

Warm entry — our customers' hubs are our beachhead

American Airlines

Customer at ICN today
JFK · PHL · DFW · CLT · MIA

Alaska

Customer at ICN today
SEA · PDX · LAX · ANC

U.S. entry already in motion: UKC 2026 3rd prize
NJ Base program first round passed — landing zone next to EWR / JFK.
CES 2027 next.

Ground handling runs on **identical IATA standard operating procedures** worldwide — the Incheon playbook applies day one.

BUSINESS MODEL

Marketplace today. Software tomorrow. Data forever.

NOW

1 · Marketplace

~30% take rate, live at ICN, in USD

Wheelchair service · airline pays $30 / hour

$21 worker	$9 BestTurn

30% take rate · ≈ $89K monthly revenue · past break-even

Same price structure exists in U.S. ground handling — the model transfers as is.

2027

2 · AI SaaS + API

Subscription

Workforce-management SaaS and surge-staffing API for airlines, handlers and airports. Launching 2027.

NEXT

3 · Data & Automation

The compounding asset

Largest labeled dataset of airport ground behavior — the training ground for airport robotics.

Ready for the U.S.: a proven price card, a proven take rate, and customers who already pay it — American Airlines and Alaska Airlines, at ICN, today.

TRACTION

Proven at one of the world's hardest airports

$1.85M

2026 revenue target
(vs $378K in 2025)

6,300+

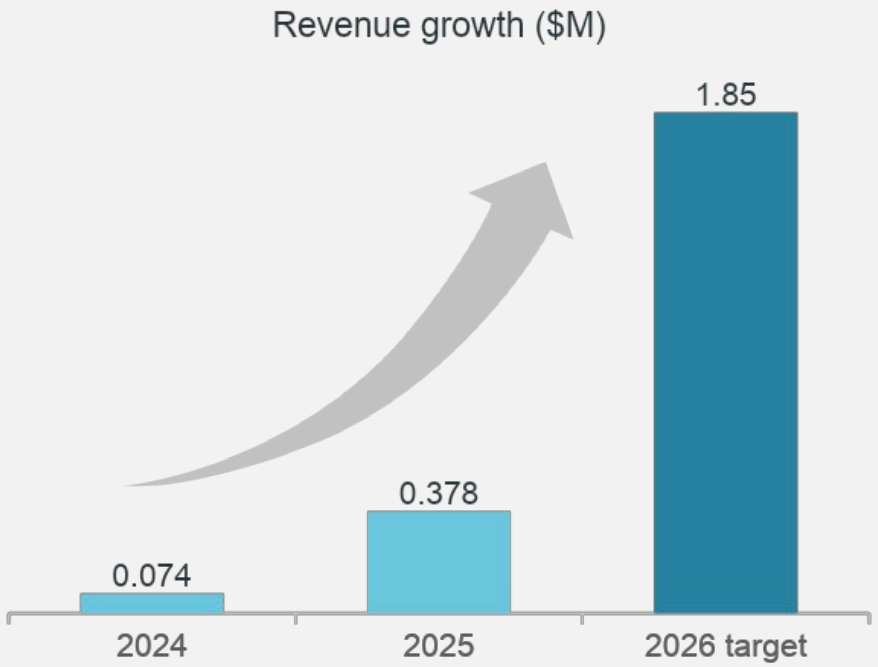

Live operations across
14 airlines & handlers

+93.3

Customer NPS, rated in-app after
every job (70.1% response rate)

-20%

Lower labor cost – customers pay
only for hours worked, not for idle time

Wheelchair & special passengers

American Airlines · Alaska · HAWAIIAN · QATAR AIRWAYS · SINGAPORE AIRLINES

Cabin cleaning

PARATA AIR · MAI Myanmar Airways International · Aero_K

VIP concierge embassies · private-jet clients · celebrities

Pipeline $1.1M backlog (2026) · $6.4M contracted pipeline by 2027
avg. contract 2.5 yrs

COMPETITION

Top-down WFM can't do what a licensed marketplace can

	BestTurn	Aviation WFM SaaS (Springshot, Inform)	Generic gig platforms (Instawork et al.)
On-demand external workforce	**Yes — core product**	No	Yes, but not airside
Secure-zone credentialing	**Digitized & verified**	Partial	No
AI matching on behavior data	**RL on live ops data**	Top-down scheduling	Basic matching
Aviation compliance (IATA SOP)	**Built in + licensed**	Yes	No

Moat: aircraft-handling license · security-cleared worker pool · behavioral dataset from 6,300+ live operations · 17-year aviation network.

TEAM

Aviation operators + AI builders

Wonjin Choi — Founder & CEO

17 years in global aviation — Korean Air (Europe HQ), Country Manager at Aeroméxico Korea/Japan, IATA Fast Travel Working Group.

James Baek — CTO (fractional)

M.S. in AI, B.S. in CS (Yonsei). 15+ years serial founder — leads the SpotWork AI architecture.

Junghee Park — COO (designated)

15 years HR in startups & ventures · 10 years international development · founded an AI smart-farm startup.

Why this team wins in the U.S.: the founder has sold to and operated for U.S. and European carriers for 17 years — the buyers are already in his network.

ROADMAP

Korea today. The U.S. tomorrow. Then airport by airport.

NOW · 2026

Korea

Proven at Incheon — 6,300+ live operations, 14 airlines & handlers, past break-even.

H1 2027

U.S. entry

UKC 2026 3rd prize
First station near EWR / JFK via NJ Base — with the carriers who already buy from us.

H2 2027 →

Scale

Second U.S. station, then airport by airport — the way Uber went city by city.

THE ASK

$1.5M to put BestTurn in a U.S. airport by H1 2027

Raising now (bridge round)
$1.5M

Valuation
$15M

First U.S. airport operation
H1 2027

Use of funds

40% U.S. market entry — entity, ops lead, first station
35% Product & AI — SaaS, matching engine, dataset
25% Compliance & working capital

What it buys

A profitable Korean operator becomes a two-country platform — and the U.S. reference that prices the Series A.

wonjin@bestturnaround.com

Same customers. Same playbook. Different airports.
