colosseum

Supply Chain OS & Service Provider

One platform.
The entire chain.

Supply Chain Simplified, Success Delivered.

Sep. 2026 | Jinsu Park, CEO & Founder | Colosseum Corporation

Proprietary & Confidential I 2026 Colosseum Corporation, Inc. All Rights Reserved.

colosseum

We run the entire supply chain for you.

Colosseum runs the supply chain on behalf of brands and manufacturers.

We own no warehouses and no trucks. We run a partner network on our own software.

01	02	03	04	05

Source : Mordor Intelligence · 2026–2031

A bigger equipment market means more customers who must choose and run that equipment.

PAIN POINTS

80% of the world's warehouses will run automation solutions by 2028 · Gartner

46% want transformation. Most never finish.

Capital	Investment lands before any return.
Software	If it does not fit the floor, it dies.
Decisions	Proposal, quote, design are disconnected.

All three burdens fall on the customer.

Customers want the result, not the risk.

No equipment. No system. No hiring.

colosseum

A common base. Then layers by customer.

SAMSUNG NAVER kakao LOTTE Hanwha CJ LG Electronics Dr.Melaxin KRAFTON

REVENUE BY CUSTOMER TYPE

LAYER 2

Manufacturers · Retailers

Receivables factoring · instant payout

Financing return

Brands going global

Cross-border · channel entry · retail

Retail margin

Companies automating

Diagnose · design · install · service

Subscription + brokerage

COMMON TO EVERY CUSTOMER

LAYER 1

Logistics operations · SCM transformation

Every customer starts with this contract.

Operating fees + platform licence

Each added layer adds revenue. That is why revenue outgrows customer count.

colosseum

One masterbrand. Four operating fronts.

Every front runs on the same platform, and each carries its own brand into its own market.

The structure is deliberate: customers meet a specialist, and behind the specialist stands one system.

Structural symbiosis: four brands, four markets, one operating system underneath.

colosseum

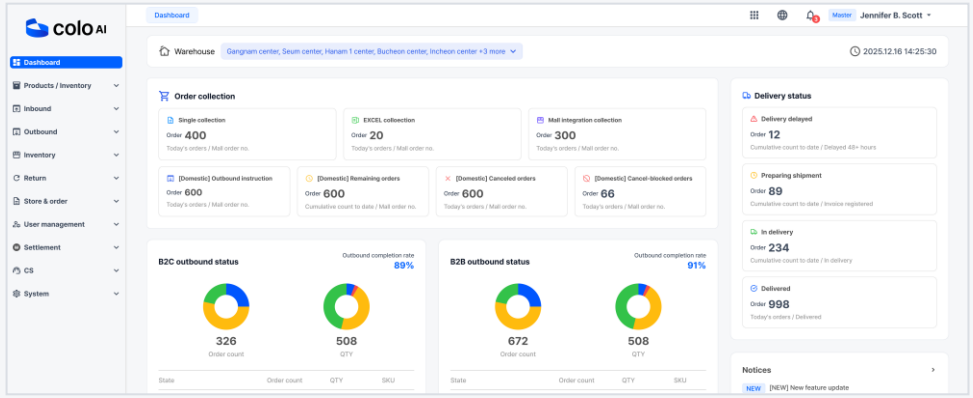

Two halves of Physical AI.

We build the software that decides and the automation that moves.

Most vendors own one side. Owning both is what lets us change an operation rather than supply it.

colo AI

SOFTWARE

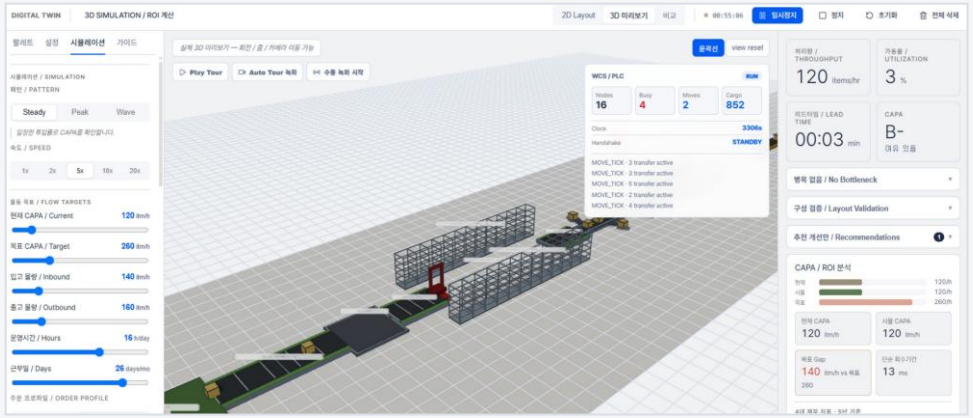

Global-standard WMS, OMS and TMS unified into one system.

Throughput	Labor	Total cost
+30%	−20%	−15%

colosseum | vault

HARDWARE AUTOMATION

Diagnosis, design, simulation, installation and service in one flow.

Site diagnostic	Analysis to quote	Service centers
2 wks	2 days	54+

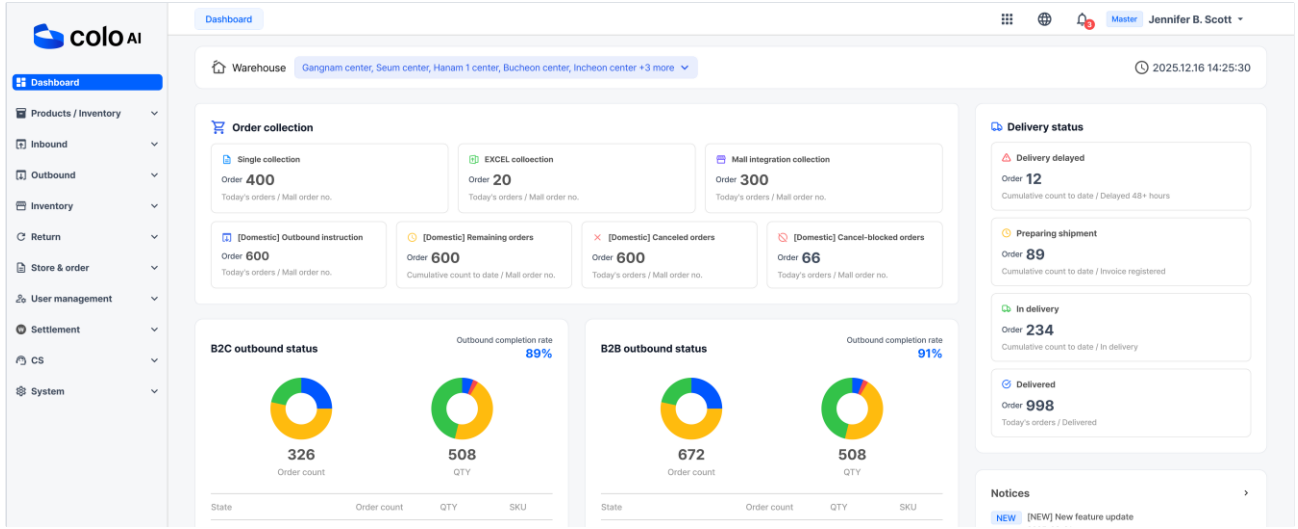

Software that decides. Automation that moves. One company doing both.

colosseum

AI changes the floor.

COLO AI is logistics management software that unifies global-standard WMS, OMS, and TMS.

Warehouse, order, and transport management on one screen. Six core functions, 26 modules.

PATENTS

colosseum

colo AI

Physical AI, already taking shape.

Three products carry it, each scoped, staffed and on the build calendar.

The roadmap is an execution plan: every stage becomes the precondition for the next.

AI CRM
One-stop diagnostic and design tool for logistics automation.

Colo NOVA
Next-generation modular platform for integrated supply chain management.

FD Agent
An AI supply chain coordinator.

WHY THIS IS REAL

Practical

It runs on the floor, not in a demo.

Real

Real environments, real operating data.

Feasible

Inside today's cost, time and infrastructure.

Not concepts on a slide, but the working substance of our next-generation Physical AI.

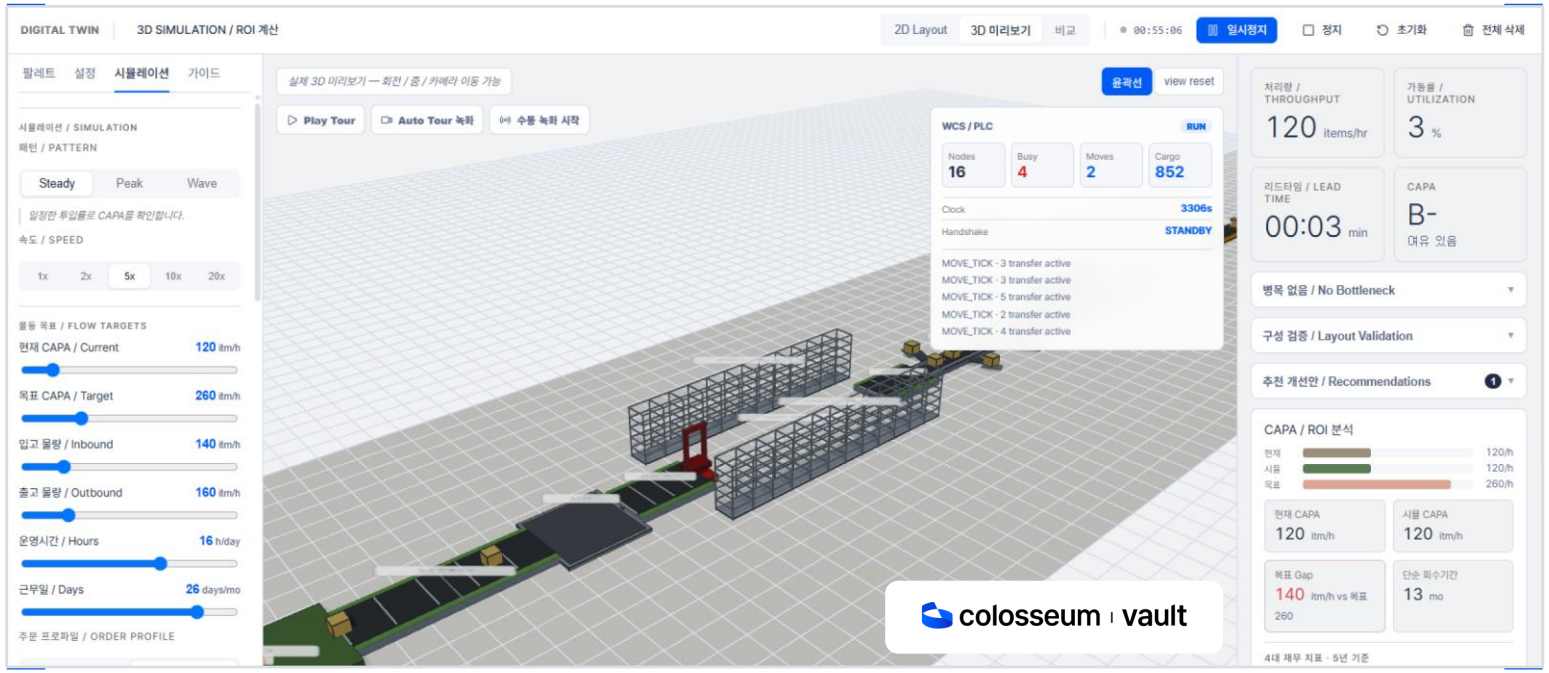

AI CRM in Q3 2026. Colo NOVA in Q4. FD Agent in Q1 2027. Logistics humanoids follow.

colosseum

Not choosing equipment—making the right decision.

Proposal, quote, and design are disconnected, so adoption takes months.

More than eighteen years of industry experience on average. A team proven on the floor.

colosseum

Series C, and why this compounds.

SERIES C

$25M

Q1 2027

USE OF PROCEEDS

- **Seamless Asia–US solution**
  One integrated platform across both markets
- **Logistics humanoids**
  Physical AI onto the floor at scale
- **US anchor centers**
  Own capacity in the metros we serve

Public listing targeted in Korea or Hong Kong, second half of 2028.

WHY WE COMPOUND

01 Flexibility

Operations and system blocks are modular, so any shipper and any warehouse fits without a rebuild.

02 Field-proven

Built for hard operations — detailed, high-difficulty work, with a UI the floor actually uses.

03 Self-advancing

The only company running the service and building the software. Constant floor contact, fast and frequent updates.

04 Economics

No capex required, and far below top-tier WMS pricing. ROI lands from the first month.

Building the future of supply chain management through data-driven partnerships.
